

SFT21 Business Concept

(Global Online Community)

In today's digital era, where social networks and online commerce continue to evolve every day, SFT21 introduces an innovation that changes the rules of the game.

The SFT21 Business Concept sets new standards by creating a unique global online community designed to combine the power of social networking and user connectivity with e-commerce, direct sales, and franchise business opportunities.

The SFT21 Business Concept is not just another platform—it is a revolutionary project that gives its registered members the opportunity to participate in building and expanding our community, either passively as License Owners and/or actively as online users and franchise partners. As the company grows through all of its projects, members will also participate in the distribution of company profits.

This project has a clear mission—to build a global community with strong local and regional foundations, enabling every member to actively participate in the development of the digital economy.

We launched the SFT21 Business Concept with the best intentions—honestly, ethically, and above all, transparently.

Whether you are an experienced entrepreneur or looking for your very first business opportunity, the SFT21 Business Concept offers a solution for you. Our system is designed to be simple to understand and easy to implement, even without previous experience.

We believe in the potential and power of the community we are building, as well as in its social value. We invite you to join us on this journey!

Study the Concept and Make Your Decision.

IMPORTANT NOTICE

Our business model is based on franchising, education, sales network development, and building an online community. We are not an investment company, and we do not collect capital or manage funds on behalf of others.

During the current phase of building our core infrastructure—including the development of our key platforms (SFured, SFnet, and SFshop)—access to our community is available exclusively through the purchase of a License Package.

Once the development of our core software has been completed and the platforms become fully operational, we will begin franchise operations, and the opportunity to purchase License Packages under the current conditions will be discontinued.

From that point forward, our business will continue through the purchase of Starter Packages for active members or through free registration for all users of our social network and online marketplace.

To avoid any misunderstanding, and following legal advice regarding the word “Invest” in our previous company name, we decided to change the company name from “InFace Invest Group”.

Our new company name, “SFT21,” more accurately reflects our terminology and core business activities while eliminating the possibility of being perceived by potential users or financial regulatory authorities as a financial or investment institution.

As the company continues to grow and eventually expands its operations to the level of a financial institution, we reserve the right to change our company name again in the future and restore the name “InFace Invest Group.”
